Summary

Product Manager (**3+ years**) who brings scientific research training (MSc Cancer Research, Glasgow) into AI first product decisions. Led Microschedule, Narayana Group's org wide planning system, from conception through rollout across **700+ institutions**. Currently driving a 0 to 1 Gen AI Lesson Planner that has cut teacher planning time by **70%** for **30K+ users**. Ships across a **4 app portfolio** (iOS + Android) with **2.2M+ downloads** at a **4.6** average rating, and runs OKRs at a **90% hit rate** through hypothesis driven, evidence led experimentation.

Experience

Associate Product Manager

Sept 2023 – Present

Narayana Group | One of Asia's largest educational networks | 700+ institutions, ~9L students Hyderabad, India

- Led **Microschedule** from conception through rollout, digitizing what had been a manual, booklet based planning process into the org wide system now used to plan, report, and monitor progress – reclaiming **~INR 4Cr/year** in teacher and admin time
- Leading development of a **0 to 1 Gen AI Lesson Planner** integrated with Microschedule's curriculum graph, auto generating optimized teaching plans for **30,000+ teachers** pan-India
- Cut time spent on lesson planning, progress recording, and logging from up to **1 hour** to as little as **5 minutes** in most cases, with no more than **20 minutes** even in edge cases, freeing up teacher time for direct student engagement
- Ship and iterate across a **4-app** mobile portfolio (iOS + Android) with **2.2M+ downloads** and a sustained **4.6 ★** average rating
- Own end to end delivery across **20+ systems** spanning academic operations (Microschedule, LMS, Academic Audit, attendance), operations (Fleet Management, HRMS, fee payments), and engagement (ticketing, CMS, parent communication apps, wellbeing platform), live across **700+ institutional units**, lifting operational efficiency by **~25%**
- Drive cross functional alignment across design, engineering, and QA; core feature adoption is up **~40%** since
- Conducted **hundreds** of user interviews and workflow analyses that reshaped roadmap priorities and lifted user satisfaction by **~30%**
- Tightened agile prioritization, bringing release cycle time from **10 to 8 days** (**20% faster** shipping)
- Run OKRs across the product function at a **90% hit rate**; found and automated high-friction workflows, cutting manual task entry from **6 min to 2.5 min** (**~60% reduction**)

Business Analyst Intern

Apr 2023 – Sept 2023

Terranova | Healthcare Hyderabad, India

- Diagnosed operational inefficiencies from performance data and drove process changes that lifted revenue by **15–20%**
- Mapped customer pain points into product and process recommendations that the team adopted

Skills

Product: 0 to 1 Development, Product Strategy, Roadmapping, PRDs, User Research, Usability Testing, Stakeholder Management, OKRs, Agile (Scrum/Kanban), Cross functional Leadership, GTM Strategy, Wireframing, Prototyping

AI & Gen AI: Prompt Engineering, LLM powered Product Design, Gen AI Workflows, Human in the Loop Evaluation

Data & Analytics: SQL, Google Analytics (GA4), Product Analytics, Workflow Automation, Advanced Excel

Tools: Jira, Figma, Balsamiq, Claude Code, Antigravity, Lovable, ChatGPT

Certifications

ISB – Product Management

Growth School – Product Management Career Accelerator Program

Education

University of Glasgow

MSc in Cancer Research & Precision Oncology

Sept 2021 – Oct 2022

Glasgow, UK

SRM Institute of Science and Technology

BTech in Biotechnology

July 2017 – June 2021

India
